"Learn Wisely, Live Proudly"

Dear Parent/Guardian/Carer

I write to inform you that a student in our school has recently completed treatment which results in a lowered immune system (bone marrow transplant), which means the student is more prone to getting ill from infections. As the student is not contagious but has a chronic illness, it is important he/she participates actively in the day to day school program without major limitations. A major concern, however, is that if this student develops measles, chickenpox, whooping cough or influenza, he/she could become seriously ill. I seek your cooperation in preventing this situation.

If your child has or may have measles, chicken pox or other infectious illness, I would ask that you please:

- 1 Do not send them to school
- 2 Notify the school office as soon as possible
- 3 Take them to your GP or medical centre to confirm diagnosis if possible

Thanking you in anticipation

Karen Maraga
Principal
